Experience

Full-Stack Web Developer Intern | CIO Mogul

Dec 2025 – Mar 2026

- Developed magazine websites and reusable interface components for CIO Mogul's web properties.
- Built an editorial administration interface backed by Supabase and PostgreSQL.

Selected Projects

BattleCP | Multiplayer Programming Game

Rust, Axum, Tokio, Next.js

- Built and deployed a Battleship game where Codeforces problem-solving unlocks overheated weapons.
- Implemented WebSocket match updates, server-side game rules, submission verification and reconnect support.
- Shared the project with the Codeforces community and iterated on feedback. [Live demo](#) | [Launch discussion](#)

Algorithmia | Interactive DSA Visualizations

React, JavaScript, Framer Motion

- Developed interactive visualizations for sorting, trees and pathfinding through Openverse's team project.
- Connected algorithm steps to code views; co-presented the team project at OOSC 3.0, IIT Kanpur. [Repo](#)

Bluff | Imperfect-Information Game Agents

Python, PyTorch, FastAPI, Next.js

- Built a card-game engine and agents combining legal public-information features, learned policies and Bayesian opponent profiles.
- Developed reproducible simulation and component-ablation tooling; added profile persistence across games. [Repo](#)

SiliconSpire | Quadratic Assignment Solver

C++, Rust

- Implemented Grey Wolf Optimization with Tabu Search for a combinatorial assignment problem.
- Developed C++ and Rust implementations to explore solution quality and runtime behavior. [C++](#) | [Rust](#)
