

PRAJWAL KUMAR K

Bengaluru, India | +91-9740167850 | prajwal.k141205@gmail.com
[LinkedIn](#) | [Portfolio](#) | [GitHub](#) | [Codeforces](#) | [CodeChef](#) | [LeetCode](#) | [AtCoder](#)

EDUCATION

Indian Institute of Information Technology, Kottayam

B.Tech in Computer Science and Engineering; CGPA: 8.66/10.0

Kottayam, Kerala

Aug 2024 – May 2028 (expected)

TECHNICAL SKILLS

Programming: C++, Rust, Python, TypeScript, JavaScript, C, Java, SQL, Solidity, MATLAB

AI/ML: PyTorch, TensorFlow, scikit-learn, pandas, NumPy, Matplotlib

Research and engineering: Jupyter, Simulink, FastAPI, Next.js, SQL

Research interests: Algorithms and systems, game theory, machine learning and NLP, AI safety

Spoken Languages: English, German, Hindi, Kannada

EXPERIENCE AND LEADERSHIP

Full-Stack Web Developer Intern

Dec 2025 – Mar 2026

CIO Mogul (Magazine)

Remote

- Built [CIO Mogul](#), [CIO Mogul India](#), and [CIO Healthcare](#) websites for publishing articles and digital issues.
- Developed Next.js/React editorial dashboards and Supabase/PostgreSQL content workflows; implemented PDF page navigation, cover extraction, and A3-spread splitting.

Openverse and Coders Club

IIIT Kottayam

- Openverse Technical Lead (May 2025–Jul 2026): reviewed pull requests across the club and coordinated development.
- Coders Club Coordinator (Jan 2025–Present): curate problems, configure Codeforces Gym, and run campus contests.

PROJECTS

PokeForge | *Python, PyTorch, Gen 9 OU*

[Code](#)

- An agent-evaluation testbed for competitive Generation 9 OU Pokémon battles (in progress).
- Integrated pinned FoulPlay and Metamon baselines in isolated Pokémon Showdown environments; conformance and competitive strength remain under evaluation.

Bluff | *Imperfect-information games, opponent modeling*

[Code](#)

- A repeated-play imperfect-information card game for studying bluff detection and adaptation to opponents.
- Built Bayesian opponent profiles and a learned public-information bluff detector; removing the detector lowered draw-aware score by 4.9–5.8 percentage points across eight synthetic profiles.

Drishti-XAI | *Retinal imaging, MATLAB, Python*

- An explainable retinal-screening prototype evaluated for generalization across diabetic-retinopathy image datasets.
- Built the MATLAB/Python prototype and evaluation pipeline; at a fixed model and threshold, sensitivity/specificity were 0.908/0.877 on APTOS (n=733) and 0.363/0.865 on Messidor-2 (AUC 0.666).

SiliconSpire | *C++, Rust, Metaheuristics*

[C++](#) | [Rust](#)

- A Quadratic Assignment Problem solver that minimizes weighted flow-distance cost for facility placement.
- Combined Grey Wolf Optimization with swap-based Tabu Search; evaluated C++ and Rust implementations on three small QAPLIB instances, 30 seeds each.

BattleCP | *Rust, Axum, Tokio, WebSockets*

[Live](#) | [Code](#)

- A multiplayer Battleship game where solving Codeforces problems earns players turns.
- Built a Rust/Axum WebSocket backend with Codeforces validation, server-side rules, and reconnection.

ACHIEVEMENTS AND CERTIFICATIONS

Publication: First-listed author and presenter, “Collaboration-Enabled Energy-Aware Learning Model Exchange (CE-LME) Framework for Edge Computing-Assisted Applications,” IEEE ICICI 2025. [Paper](#).

Algorithmia: selected for and presented at OOSC 3.0, IIT Kanpur (2025); team presentation at T4E 2025, IIT Madras.

Hackathon: Best Software Award, IEEE MACE .hack(); 2026, Team Hogorithm (Anchor).

Competitive programming: Codeforces Pupil (peak 1221), CodeChef peak 1463, 400+ problems solved across platforms.

Cyfrin Updraft (2025): Blockchain Basics, Rust Programming Basics, Solidity Smart Contract Development, and Fundamentals of Zero-Knowledge Proofs.
