EDUCATION

Indian Institute of Information Technology, Kottayam

B.Tech in Computer Science and Engineering; CGPA: 8.66/10.0

Kottayam, Kerala

Aug 2024 – May 2028 (expected)

TECHNICAL SKILLS

Programming: Rust, C++, Python, Solidity, TypeScript, SQL

Application security: access control, input validation, request limits, CORS, security headers, threat modeling

Tools and systems: Linux, Git, Docker, Burp Suite, Nmap, Metasploit, Foundry, Noir, Anchor, Axum, Tokio

Spoken Languages: English, German, Hindi, Kannada

EXPERIENCE AND LEADERSHIP

Software Development Intern

May 2026 – Jul 2026

Edhanta

Remote

- Built learner progress flows for an education platform, guiding students through course and topic roadmaps and helping them resume unfinished lessons.
- Implemented sequential course-access gates and lesson recovery in Next.js and TypeScript with Drizzle ORM and Neon PostgreSQL; added a weekly parent-dashboard study-activity chart.

Full-Stack Web Developer Intern

Dec 2025 – Mar 2026

CIO Mogul (Magazine)

Remote

- Built and maintained magazine platforms for [CIO Mogul](#), [CIO Mogul India](#), and [CIO Healthcare](#), with article catalogs and digital issues.
- Developed editorial dashboards and Supabase-backed content workflows using Next.js, React, TypeScript, and PostgreSQL; implemented PDF-reader page handling and A3-spread splitting.

Technical Lead, Openverse

May 2025 – Jul 2026

IIT Kottayam

Kottayam, Kerala

- Reviewed pull requests across Openverse and coordinated technical work; contributed sorting visualizations to its Algorithmia DSA platform.

PROJECTS

BattleCP | Rust, Axum, Tokio, WebSockets

[Live](#) | [Code](#)

- A multiplayer Battleship game where solving Codeforces problems earns players turns.
- Secured the Axum/Tokio WebSocket service with server-authoritative state, phase/action and submission validation, bounded requests, per-connection limits, restricted CORS, and security headers.

Veritas | Rust, Solana, Anchor, TweetNaCl

[Code](#)

- A Solana voting prototype with encrypted ballot submissions and on-chain voter eligibility checks.
- Implemented Anchor checks for voter registration, voting windows, and duplicate votes; documented transaction-linkability and unaudited tally limitations.

To-Do-or-Die | Rust, Linux, systemd

[Code](#)

- A Linux reminder CLI with escalating actions as a task deadline approaches.
- Added canonical protected-path checks, symlink-safe traversal, explicit dry-run defaults, and systemd user timers; covered safety behavior with 48 tests and CI checks.

ACHIEVEMENTS AND CERTIFICATIONS

CTF team SuKMaDhe: 86th of 7,085 at HTB HOLMES CTF 2025 (65/65 challenges), 50th of 859 at BITSCTF 2026, 24th at CRACCON 2025, and 26th at ApoorvCTF 2025. [Team results](#).

Completed all listed tasks in the FamPay application-security challenge.

Best Software Award, IEEE MACE .hack(); 2026, as part of Team Hogorithm (Anchor).

Cyfrin Updraft certificates: Blockchain Basics, Rust Programming Basics, Solidity Smart Contract Development, and Fundamentals of Zero-Knowledge Proofs.
