

PRAJWAL KUMAR K

Bengaluru, India | +91-9740167850 | prajwal.k141205@gmail.com
[LinkedIn](#) | [Portfolio](#) | [GitHub](#) | [Codeforces](#) | [CodeChef](#) | [LeetCode](#) | [AtCoder](#)

EDUCATION

Indian Institute of Information Technology, Kottayam

B.Tech in Computer Science and Engineering; CGPA: 8.66/10.0

Kottayam, Kerala

Aug 2024 – May 2028 (expected)

TECHNICAL SKILLS

Programming: Python, C++, Rust, MATLAB

AI/ML and data: PyTorch, TensorFlow, scikit-learn, pandas, NumPy, Matplotlib

Research and engineering: Jupyter, Simulink, FastAPI, Next.js, SQL

Research interests: Game theory, multi-agent learning, algorithms and systems, empirical AI evaluation

Independent study: ISLP, Mathematics for Machine Learning, Stanford CS231n (in progress)

Spoken Languages: English, German, Hindi, Kannada

EXPERIENCE AND LEADERSHIP

Technical Lead, Openverse

IIIT Kottayam

May 2025 – Jul 2026

Kottayam, Kerala

- Reviewed pull requests across Openverse and coordinated technical work; contributed sorting visualizations to its Algorithmia DSA platform.

Coordinator, Coders Club

IIIT Kottayam

Jan 2025 – Present

Kottayam, Kerala

- Curate problem sets and help organize campus programming contests.

PROJECTS

PokeForge | *Python, PyTorch, Gen 9 OU*

[Code](#)

- A research prototype for building and evaluating agents in competitive Generation 9 OU Pokémon battles.
- Reproduced pinned FoulPlay and Metamon baselines in isolated Pokémon Showdown environments; simulator conformance and agent strength remain under evaluation.

Bluff | *Imperfect-information games, opponent modeling*

[Code](#)

- A repeated-play imperfect-information card game for studying bluff detection and adaptation to opponents.
- Built Bayesian opponent profiles and a learned public-information bluff detector; removing the detector lowered draw-aware score by 4.9–5.8 percentage points across eight synthetic profiles.

Drishti-XAI | *Retinal imaging, MATLAB, Python*

SIH 2026 team submission

- An explainable retinal-screening prototype evaluated for generalization across diabetic-retinopathy image datasets.
- Built the MATLAB/Python prototype and evaluation pipeline; at a fixed model and threshold, sensitivity/specificity were 0.908/0.877 on APTOS (n=733) and 0.363/0.865 on Messidor-2 (AUC 0.666).

KPlaceNet | *Image geolocation, PyTorch, ResNet-50*

[Code](#)

- A team computer-vision project that predicts geographic locations from images.
- Evaluated 12 ResNet-50 configurations on a spatially separated 3,000-image OSV-5M test subset; the best placed 3.33% within 200 km.

BattleCP | *Rust, Axum, Tokio, WebSockets*

[Live](#) | [Code](#)

- A multiplayer Battleship game where solving Codeforces problems earns players turns.
- Built an Axum/Tokio WebSocket backend with server-authoritative game rules, submission validation, and reconnect support.

ACHIEVEMENTS AND CERTIFICATIONS

First-listed author and conference presenter, “Collaboration-Enabled Energy-Aware Learning Model Exchange (CE-LME) Framework for Edge Computing-Assisted Applications,” IEEE ICICI 2025, pp. 1390–1395. [DOI](#).

Algorithmia selected for OOSC 4.0; presented at OOSC 3.0 (IIT Kanpur) and T4E 2025 (IIT Madras).

Best Software Award, IEEE MACE .hack(); 2026, as part of Team Hogorithm (Anchor).
