EDUCATION

Indian Institute of Information Technology, Kottayam

B.Tech in Computer Science and Engineering; CGPA: 8.66/10.0

Kottayam, Kerala

Aug 2024 – May 2028 (expected)

TECHNICAL SKILLS

Programming: C++, Rust, Python, TypeScript, JavaScript, SQL, Solidity

Frameworks and tools: React, Next.js, Axum, Tokio, FastAPI, WebSockets, PostgreSQL, Supabase, Docker, Git, Linux, systemd

AI/ML: PyTorch, TensorFlow, scikit-learn, pandas, NumPy, Matplotlib

Spoken Languages: English, German, Hindi, Kannada

EXPERIENCE AND LEADERSHIP

Software Development Intern

May 2026 – Jul 2026

Edhanta

Remote

- Built learner progress flows for an education platform, guiding students through course, chapter, and topic roadmaps and helping them resume unfinished lessons.
- Implemented sequential topic unlocks, cross-chapter prerequisites, and lesson recovery with Next.js, TypeScript, Drizzle ORM, and Neon PostgreSQL; added a weekly study-activity chart to the parent dashboard.

Full-Stack Web Developer Intern

Dec 2025 – Mar 2026

CIO Mogul (Magazine)

Remote

- Built and maintained magazine platforms for [CIO Mogul](#), [CIO Mogul India](#), and [CIO Healthcare](#), with article catalogs and digital issues.
- Developed editorial dashboards and Supabase-backed content workflows using Next.js, React, TypeScript, and PostgreSQL; implemented responsive PDF readers with page navigation, cover handling, and A3-spread splitting.

Technical Lead, Openverse

May 2025 – Jul 2026

IIT Kottayam

Kottayam, Kerala

- Reviewed pull requests across Openverse and coordinated technical work; contributed sorting visualizations to its Algorithmia DSA platform.

PROJECTS

BattleCP | *Rust, Axum, Tokio, WebSockets, Next.js*

[Live](#) | [Code](#)

- A multiplayer Battleship game where solving Codeforces problems earns players turns.
- Built an Axum/Tokio WebSocket backend with server-authoritative rules, submission checks, and reconnect support, plus a Next.js client.

To-Do-or-Die | *Rust, Linux, systemd*

[Code](#)

- A Linux desktop reminder CLI that escalates alerts as deadlines approach.
- Implemented Rust commands and systemd user timers, staged notification/audio/speech alerts, protected-path checks, and safe dry-run defaults; added 48 tests and CI checks.

PokeForge | *Python, PyTorch, Pokémon Showdown*

[Code](#)

- A research prototype for evaluating agents in competitive Generation 9 OU Pokémon battles.
- Reproduced pinned FoulPlay and Metamon baselines in isolated Showdown environments; simulator conformance and agent strength remain under evaluation.

Bluff | *Python, PyTorch, FastAPI*

[Code](#)

- A playable repeated-match card game and agent testbed with hidden information and bluff/call decisions.
- Built a Python engine, Bayesian opponent profiles, and a learned bluff detector; removing the detector lowered draw-aware score by 4.9–5.8 percentage points across eight synthetic profiles.

ACHIEVEMENTS AND CERTIFICATIONS

Competitive programming: Codeforces Pupil (peak 1221), CodeChef peak rating 1463, and 200+ problems solved.

Algorithmia selected for OOSC 4.0; presented at OOSC 3.0 (IIT Kanpur) and T4E 2025 (IIT Madras).

Best Software Award, IEEE MACE .hack(); 2026, as part of Team Hogorithm (Anchor).
