

PRAJWAL KUMAR K

Bengaluru, India | +91-9740167850 | prajwal.k141205@gmail.com
[LinkedIn](#) | [Portfolio](#) | [GitHub](#) | [Codeforces](#) | [CodeChef](#) | [LeetCode](#) | [AtCoder](#)

EDUCATION

Indian Institute of Information Technology, Kottayam

B.Tech in Computer Science and Engineering; CGPA: 8.66/10.0

Kottayam, Kerala

Aug 2024 – May 2028 (expected)

RESEARCH INTERESTS

Algorithms and systems, game theory and multi-agent learning, machine learning, and empirical evaluation of AI systems.

TECHNICAL SKILLS

Programming: Python, C++, Rust, MATLAB

AI/ML and data: PyTorch, TensorFlow, scikit-learn, pandas, NumPy, Matplotlib

Research and engineering: Jupyter, Simulink, FastAPI, Next.js, SQL

Spoken Languages: English, German, Hindi, Kannada

RESEARCH AND TECHNICAL EXPERIENCE

Technical Lead, Openverse

May 2025 – Jul 2026

IIIT Kottayam

Kottayam, Kerala

- Led technical coordination and reviewed pull requests across Openverse; contributed sorting visualizations to its DSA platform.

Coordinator, Coders Club

Jan 2025 – Present

IIIT Kottayam

Kottayam, Kerala

- Curate problem sets and help organize campus programming contests.

SELECTED RESEARCH AND PROJECTS

PokeForge | *Python, PyTorch, Gen 9 OU agents*

[Code](#)

- Reproduced pinned FoulPlay and Metamon baselines in isolated simulator environments; conformance and competitive strength remain under evaluation.

Bluff | *Imperfect-information games, opponent modeling*

[Code](#)

- Built a repeated-play card-game simulator with Bayesian opponent profiles and a learned bluff detector; across eight synthetic profiles, removing the detector reduced draw-aware score by 4.9–5.8 percentage points.

Drishti-XAI | *Retinal imaging, MATLAB, Python*

SIH 2026 team submission

- Built an explainable retinal-screening prototype and evaluation pipeline; at a fixed model and threshold, sensitivity/specificity were 0.908/0.877 on APTOS (n=733) and 0.363/0.865 on Messidor-2 (AUC 0.666), showing a transfer gap.

KPlaceNet | *Image geolocation, PyTorch, ResNet-50*

[Code](#)

- In a team project, evaluated 12 model configurations on a spatially separated 3,000-image OSV-5M test subset; the best placed 3.33% of images within 200 km.

BattleCP | *Rust, Axum, Tokio, WebSockets*

[Live](#) | [Code](#)

- Built asynchronous multiplayer Battleship in which players solve Codeforces problems to earn turns; implemented authoritative game state, submission checks, and reconnect support.

PUBLICATION AND RECOGNITION

First-listed author and conference presenter, “Collaboration-Enabled Energy-Aware Learning Model Exchange (CE-LME) Framework for Edge Computing-Assisted Applications,” IEEE ICICI 2025, pp. 1390–1395. [DOI](#).

Algorithmica selected for OOSC 4.0; team lightning talk at OOSC 3.0 and presentation at T4E 2025, IIT Madras. Best Software Award, IEEE MACE .hack(); 2026 (Team Hogorithm).
